About GHRC

The Annual Global Healthcare Research Conference (GHRC) aims to inspire, recognize, and support fundamental research and innovation in Medicine and allied sciences. Supported by ICMR, BMJ and other eminent scientific bodies, GHRC is an ideal collaboration platform for researchers, academicians, scholars, and students to share experiences, ideas, and research results, as also seek solutions to existing and emergent challenges within the framework of each year's research theme and strategy.

The theme for every year will be announced through a call for proceedings four to eight weeks in advance. The 2021-GHR Conference is christened Basic Research, aimed at inspiring and developing a whole new breed of research scholars who are committed to furthering scientific knowledge that paves the way for breakthrough solutions and possibilities.

Executive Chairman - HCG

Dr. B S Ajaikumar
Executive Chairman - HCG
Bengaluru, Karnataka
India

In Healthcare, we all know we need more scientific ways to predict, prevent, diagnose and treat diseases and we believe research is the source. At HCG, academics is an inseparable part of our endeavour to sustain excellence.

This conference is an opportunity to inspire our young to choose research as a career and learn from experts how to present research in an authentic setting beyond disciplinary, institutional and organizational context. This will develop students' skills and confidence, giving additional value over and above the recognised benefits of engaging in research. Significant implications for practice should include supporting constructive dialogues between students and the creation of authentic and professional multidisciplinary contexts for sharing research. Join us in further activating this research community.

Why attend ?

- Well-curated program focussing in all aspects of basic research
- Every-day theme-based content delivered by renown national and international speakers
- Good Clinical Practise Certification
- Hands – On training on
 - a) Critical upraisal of scientific paper
 - b) Calculating Clinical Significance (Effect Size, NNT)
- Access to well established Clinical Research Organisation
- Access to editors and Subject matter experts from Journals
- Motivating talks on why one should choose a career in research
- Network with peer and renown research universities
