SUPPORTED BY

INTRODUCTION

The “all-on-four” treatment concept was developed to maximize the use of available remnant bone in atrophic jaws, allowing immediate function and avoiding regenerative procedures that increase the treatment costs and patient morbidity, as well as the complications inherent to these procedures.

LEARNING OBJECTIVES

- To independently plan and assess a case of full mouth rehabilitation.
- Apply the surgical concepts of All on Four techniques in the placement of implants.
- Prosthetic workflow in All on Four Implant Rehabilitation.
- Strategies for prevention and management of surgical and prosthetic complications.

LEARNING OUTCOMES

- To be able to plan and execute a case for full mouth rehabilitation to achieve predictable outcome.
- To perform step wise surgical protocols including all techniques to raise a flap, suture and monitor healing.
- To restore All on Four implants using Prosthetic Protocols including Occlusal and Aesthetic considerations.
- To manage both hard and soft tissues in compromised situations.
- Assistance in setting up an Implantology Practice.
- Value Addition of Dental Implantology and full mouth rehabilitation in your clinical practice.

COURSE OVERVIEW

A practical and clinically oriented program which helps the clinician acquire all skills and practical proficiency to understand plan and practice All on Four concept in most clinical situations with confidence and efficiency.
