

Brachial Plexus Cadaver Workshop

 Oct 28th & 29th, 2023

 RAMAIAH ADVANCED LEARNING CENTRE
BENGALURU, INDIA

GHA
GLOBAL HEALTHCARE
ACADEMY

About

The techniques employed in brachial plexus surgery have undergone significant evolution over the years, piquing the interest of numerous young surgeons in this domain. While the recuperation of shoulder and elbow functionality post brachial plexus surgery is commonplace, a plethora of innovative surgical methods are emerging to facilitate hand function recovery.

An exceptional prospect presents itself to glean insights from the established experts in the field. An educational workshop has been organized, tailored to benefit both newcomers and seasoned practitioners alike. The workshop will encompass instructional sessions and hands-on dissections, focusing on various procedures, including:

- Exposure of the brachial plexus utilizing supraclavicular and infraclavicular approaches.
- Utilization of vascularized ulnar nerve grafts from the contralateral C7 nerve.
- Multiple nerve transfers such as Spinal accessory to Suprascapular, Oberlins 1 and 2, Intercostal to musculocutaneous and axillary nerves, Somsachs procedure, and an array of other distal nerve transfers.
- Implementation of the Wang's Procedure.
- Application of free functional muscle transfers.
- Execution of secondary procedures.

These focal points offer an exceptional learning experience for attendees, providing valuable exposure to advanced techniques and approaches in the realm of brachial plexus surgery.

Highlights

-  **1**
Top notch faculty
-  **2**
Best cadaver lab
-  **3**
Crisp faculty talks
-  **4**
Interesting case discussions & case scenarios
-  **5**
KMC Accredited

Registration Fee

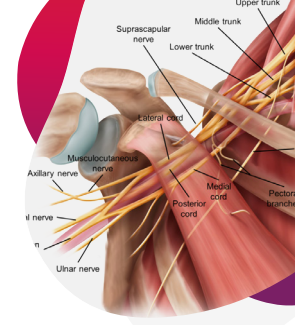

Category	Fees
CME + Hands On	₹ 25,000 + 18% GST
CME+ Observer	₹ 7,000 + 18% GST
